EXPERIENCES

Front-end software engineer - *Virtuo Technologies*
📅 **december 2022 - march 2024**
- Co-managed development of Virtuo's car rental platform, focusing on **UX/UI enhancements**
- Developed and integrated features using **React**, **Next.js**, and **TypeScript**
- **Migrated JavaScript components to TypeScript** for better code maintainability
- Executed **SEO strategies**, creating and optimizing the **sitemap** for higher search rankings
- **Migrated website routing from Page Router to App Router** in Next.js for enhanced performance and scalability

Front-end developer - *Freelance*
📅 **september 2021 - december 2022**
- **Redesigned** a website connecting startups with large enterprises using **JavaScript**, **Vue.js**, and **Bootstrap**
- Developed a real estate agency website with **WordPress** and **Elementor**
- **Self-taught Vue.js, Nuxt.js, React,** and **TypeScript**, applying them in various projects to demonstrate adaptability and continuous learning

Front-end developer - *Apprenticeship at Opsone*
📅 **september 2019 -august 2021**
- Designed and developed the **Nicolas Hulot Foundation** website using **JavaScript** and **WordPress**
- Led the **graphic and technical redesign** of an e-commerce site with **JavaScript, Magento,** and **Symfony**
- Performed web integration using **HTML/CSS (Sass, BEM)** and **JavaScript**, ensuring high-quality, maintainable code

Web integrator - *Internship at Opsone*
📅 **march 2019 - september 2019**
- Developed **dynamic web pages** with **HTML5, CSS3, Sass,** and **jQuery**
- Ensured **retro-compatibility** for older browsers across web projects
- **Optimized SEO, accessibility**, and **performance** using Lighthouse
- Collaborated with CSM and clients to design and implement graphic models

PROJECTS

Portfolio - React | Next | TypeScript | Tailwind CSS (https://manidavilay.com)
- React/Next project showing my projects and my downloadable resume using app router
- Creation of the graphic design from scratch using **Midjourney**, **GIMP**, **Procreate**, and **Figma**

Dead By Daylight - Vue | Nuxt (https://deadbydaylight.manidavilay.com)
- First Nuxt project using **Vuetify** for the design, showcasing informations about Dead By Daylight's characters (video game) with **different categories,** and a **search bar,** using **static data**

Weather App - React | TypeScript | OpenWeather API (https://weatherapp.manidavilay.com)
- React project using **OpenWeather API** allowing to search for different locations around the world for their current **weather**, **date** and **time** with **dynamic corresponding backgrounds**
