EXPERIENCES

Front-end software engineer - *Virtuo Technologies*
📅 december 2022 - march 2024

- **Microservice co-ownership:** worked on the development and maintenance of the "govirtuo.com" platform, focusing on features and UX/UI using **React** and **Next**
- **Code quality:** ensuring a maintainable codebase through **pair programming** and **code reviews**
- **Back-end, API & SEO:** developed an **API for XML sitemap** in **Node** and **Express**, enhancing SEO and managing API integrations
- **Maps & booking process:** improved map features and booking process with car filtering by brand, model and location
- **CMS & collaboration:** collaborated with the product team to optimize and develop features on **Prismic CMS**
- **Migration & modernization:** worked on migration to **TypeScript** and updated routing systems for scalability
- **Database & testing:** worked with **MongoDB,** and API testing using **Postman**

Front-end developer - *Freelance*
📅 september 2021 - december 2022

- **Platform redesign:** revamped a startup-enterprise platform with **JavaScript, Vue,** and **Bootstrap**
- **Real-estate website:** developed a real estate agency site using **WordPress** and **Elementor**
- **Self-taught skills:** learned **Vue, Nuxt, React,** and **TypeScript**, applying them in projects to demonstrate adaptability and continuous learning

Front-end developer - *Apprenticeship at Opsone*
📅 september 2019 -august 2021

- **Website development:** designed and developed the Nicolas Hulot Foundation site with **JavaScript** and **WordPress**
- **E-commerce redesign:** led graphic and technical overhaul of an e-commerce site using **JavaScript, Magento,** and **Symfony**
- **Web integration:** integrated with **HTML/CSS (Sass, BEM)** and **JavaScript**, ensuring maintainable code

Web integrator - *Internship at Opsone*
📅 march 2019 - september 2019

- **Web development:** built dynamic pages with **HTML5, CSS3, Sass,** and **jQuery**
- **Compatibility:** ensured retro-compatibility for all browsers
- **Optimization**: enhanced SEO, accessibility, and performance using Lighthouse
- **Collaboration:** designed graphic models with CSM and clients

PROJECTS

Portfolio - *React | Next | TypeScript | Tailwind CSS* (https://manidavilay.com)

- React/Next project showing my projects and my downloadable resume using app router
- Creation of the graphic design from scratch using **Midjourney**, **GIMP**, **Procreate**, and **Figma**

Dead By Daylight - *Vue | Nuxt* (https://deadbydaylight.manidavilay.com)

- First Nuxt project using **Vuetify** for the design, showcasing informations about Dead By Daylight's characters (video game) with **different categories,** and a **search bar,** using **static data**

Weather App - *React | TypeScript* (https://weatherapp.manidavilay.com)

- React project using **OpenWeather API** allowing to search for different locations around the world for their current **weather**, **date** and **time** with **dynamic corresponding backgrounds**
