EXPERIENCES

Full-stack Developer (70% front-end, 30% back-end) - *Virtuo Technologies*
📅 december 2022 - march 2024

- **Front-end & UX/UI**
  - Co-owner of **govirtuo.com codebase**, development and maintenance using **React, Next.js** and **TypeScript**
  - Working on the **complete graphical redesign of the homepage**, based on **Figma** mockups and **Storybook**, to enhance ergonomics and user experience

- **Code Quality:**
  - Ensuring clean code through **pair-programming** and **code reviews**

- **Product & Features:**
  - **Active suggestions of feature improvements** such as **car filtering by location** and optimizing the car booking process
  - Working closely with the product team to identify and address user needs

- **Back-end & SEO:**
  - Development of the **dynamic XML sitemap generation API** using **Node.js**, and **Express**, significantly improving SEO

- **Migration & Modernization:**
  - Migration of **JavaScript components to TypeScript**
  - **Routing systems upgrades from Page Router to App Router**, enhancing performance and scalability

- **CMS & Tools:**
  - Creation and optimization of **CMS blocks on Primic**: user reviews, blog articles, and links to Apple and Google Play stores, ensuring a consistent and engaging user experience

- **Database & Testing:**
  - Use of **MongoDB** for data management
  - API testing with **Postman** to ensure reliability and compliance

Front-end Developer - *Freelance*
📅 september 2021 - december 2022

- **Platform Redesign:**
  - Revamp of a startup-enterprise platform with **JavaScript, Vue,** and **Bootstrap**

- **Real-Estate Website:**
  - Development of a real estate agency site using **WordPress** and **Elementor**

- **Self-Taught Skills:**
  - Learning of **Vue, Nuxt, React,** and **TypeScript**, applied to personal projects to demonstrate adaptability and continuous learning

Front-end Developer - *Apprenticeship* at Opsone
📅 september 2019 - august 2021

- **Website Development:**
  - Design and development of the Nicolas Hulot Foundation site with **JavaScript** and **WordPress**

- **E-Commerce Redesign:**
  - Leader of the graphic and technical overhaul of a personalized books e-commerce platform using **JavaScript, Magento,** and **Symfony**

- **Web Integration:**
  - Integration with **HTML/CSS (Sass, BEM)** and **JavaScript**, ensuring maintainable code
